

The Empire of Sunilian States

Kaiserliches Ministerium für Äußeres KMfÄ

Ma Greb

30th of March 2016

Public Statement

Issued by the Imperial Ministry for External Affairs (KMfÄ)

Released from Ma Greb, a province of the Empire of Sunilian States

Subject: Public Statement regarding instability-seeking organizations in Sunilia's North African colony Bir Tawil

Ruef Sunilien!

The Imperial Sunilian Government has, with great concern, watched increasing separatist action in the Sunilian colony of Bir Tawil. As a nation made up of a number of smaller states, the Empire of Sunilian States as a union is obliged to maintain peace and unity throughout the country and hence fight back against illegal separatist organizations. The rise in the number of such attempts at disturbing the national unity increase the risk of political tensions and destabilizing the region – risks that must, at all costs, be prevented.

And thus the separatist activity in Sunilia's North African colony violates Sunilian rights and principles. The Imperial Ministry for External Affairs therefore reminds all those who seek to cause instability in Sunilia and its colony that they are subjected to Sunilian laws and regulations and that the Sunilian authorities have the right to intervene. Seemingly peaceful intentions can no longer be used as an excuse for bringing instability to the world. The Imperial Ministry for External Affairs understands that there are problems such as lacking recognition of LGBT rights in parts of the world, which the so-called "Kingdom of Bir Tawil" is seemingly concerned about, however the Sunilian Government is taking great actions at solving these problems and the Empire of Sunilian States is a very open and peace-loving nation. But addressing such problems by land-grab actions like those attempted by separatist groupings is a very wrong approach and the Sunilian National Party strictly condemns these.

Sunilia vigorously protests against such so-called independence movements as these pose a threat not only to our nation, but to the entire region by causing destabilization and possible political tensions, both of which should be prevented under all circumstances.

The Imperial Ministry of External Affairs wants to emphasize that the government of the Empire of Sunilian States is open to dialogue and ready to make the nation excel in all areas. However, it cannot understand how people with seemingly good intentions can take such wrong and barbaric measures.
