

The Empire of Sunilian States

Abteilung für Natur & Umwelt (des KMfI)

Bencia

28th of July 2017

Public Statement

Issued by the Bureau for Nature & Environment (of the Imperial Ministry for Internal Affairs)

Released from Bencia, the capital of the Empire of Sunilian States

Subject: Creation of Bureau for Nature & Environment, nature reserve in Bencia Province

Ruef Sunilien!

By imperial decree, the Bureau for Nature & Environment has been formed as part of the Imperial Ministry for Internal Affairs (KMfI) of the Empire of Sunilian States. It is the Bureau's task to deal with all nature, preservation and environmental questions pertaining to the nation. This comes as part of further increased efforts for environmental preservation by the Sunilian Empire.

Further, the Empire of Sunilian States has created its second nature reserve, which is administered by the newly formed Bureau for Nature & Environment. With an area of only 10 square centimeters, this nature reserve in Bencia Province is the world's smallest. It is also Sunilia's first and, so far, only national park as the other nature reserve, located in western Canada, is not easily accessible.

These recent happenings show the Government of the Empire of Sunilian States' continued commitment towards increasing environmental preservation and protection efforts.

Large parts of the nation's electricity originate from renewable sources, with the capital province of Bencia and its surrounding province, Tamieh, being completely powered on "green" electricity.

As part of conservation efforts for the temperate rainforest in western Canada, Sunilia acquired a ten-square meter large piece of the forest in 2012. This was the Empire's first nature reserve, the administration of which has now been moved to the Bureau for Nature & Environment.
